

PROTOCOL REPEATER

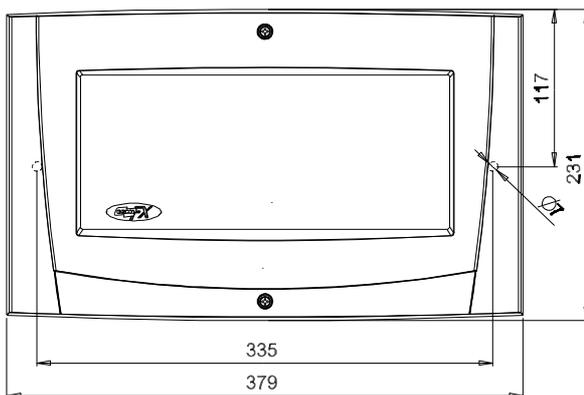

REPX Protocol Repeater

The REPX protocol repeater duplicates the INFO serial communication line.

Max. four REPX units can be connected to one FX panel.

Mechanical installation

Technical data

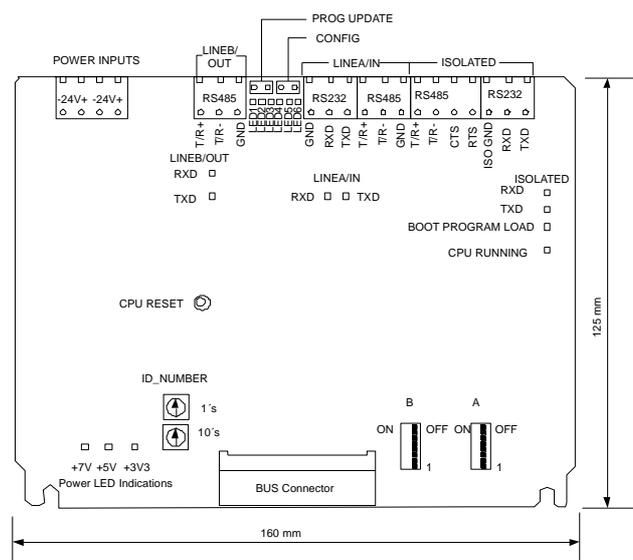

Dimensions (W x H x D)	379 x 231 x 54 mm
Weight	2,1 kg
Colour	Blue (NCS S 4020-R80B)
Operating Temperature	+5°C ... +40°C
Humidity	max. RH 95%
Operating Voltage	19 ...30 VDC
Standby current	50 mA
Serial communication ports	In: RS485 or RS232 Out: RS485
IP Rating	IP30

Pelco reserves the right to modifications.

SW update

The unit is set to software update state by setting "prog update" jumper ON and restarting the unit (by pressing the CPU reset button). The sw update can be done with PC loader tool via incoming RS232 serial port. During the software update of the REPX unit the communication line to the FX panel (RS485) must be disconnected. INFO protocol must be configured / enabled on the used port on fire panel (rs485 or rs232).

System principle

Note! The maximum number of REPX (REPX-OB) units connected to one FX_ panel is 4.

The maximum number of REPX, REPX-OB, FMPX, DAPX, MCOX, MCOX-OB, ZLPX, ZLPX-IC units connected to one FX_ panel is 16.

The RS232 setting is used for the software update.

The INFO-line in the REPX (REPX-OB) unit must be disconnected during the REPX (REPX-OB) configuration.

Note! The maximum RS485 cable length between 2 devices is 1000 m.

The maximum RS232 cable length is 10 m.
