- possibility to change a background color

Art. 7111000

Pull cord button

- big, red call button
- whole area of button shines
- finding light
- two LED diode lights a button after triggered
- sound confirmation of made call
- 2m. line with a holder
- protection against too strong pull
- flat surface, easy to clean
- liquids based on alcohol allowed to clean
- possibility to change a background color

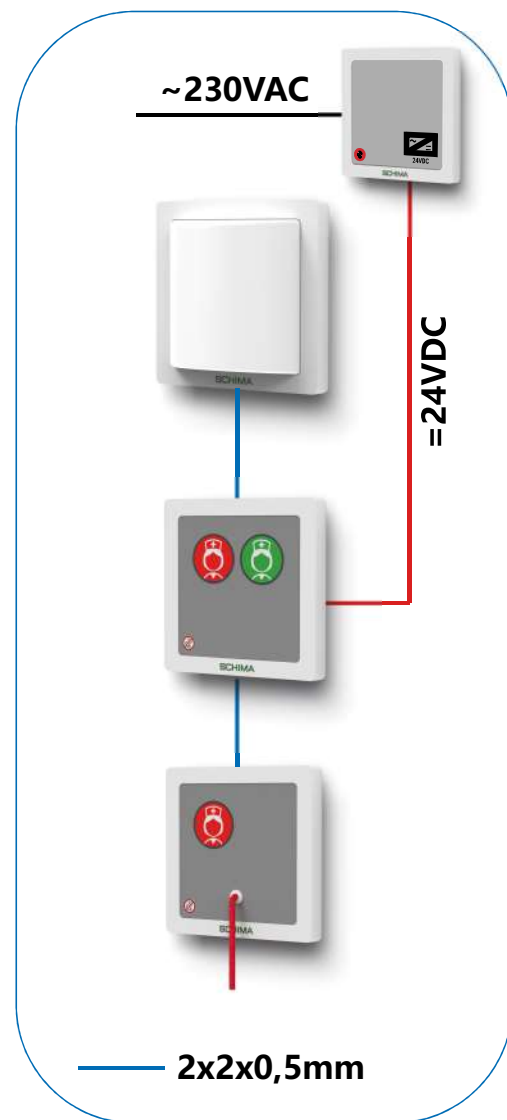

Art. 4150000

Power supply 0,25A

- U = 24VDC
- I = 0,25A
- flush mounting

Art. 957446

ANTIBACTERIALITY - Microban Additive IB14-2123-100 prepared by Microban Products Co., USA. was used in the production of casings made of ABS. It is a formula based on silver ions with a broad spectrum of activity.

The front elevations are made of LT Digital reFlex foil by Transcontinental Advanced Coatings - a global leader in the production of advanced coatings. Antibacteriability was obtained by the addition of SteriTouch based silver.
