Inspired by the look of contemporary LED lights, the frameless design of the new 10W loudspeakers has all the makings of an instant classic. The 10W powered speaker is equipped with a 200mm full-range loudspeaker and a 100V transformer with 3 power adjustments. The powder-coated metal housing in RAL 9016 guarantees long-term stability. For additional reliability, the speaker is impregnated against wetness.

The speaker is also secured with protection class IP 21C against the security risks of environmental influences. Fast and easy installation through WAGO 221 connector and strong spring clamps with protective caps for vibration damping. The connecting cables can be supplied by rubber grommets in the fire dome.

Special paint of the speaker in 4-digit RAL or NCS colour available at extra cost.

The fire dome is included in the delivery.

This speaker is suitable for a ceiling strength of approx. 1-45 mm. Our specification is primarily related to solid ceilings. An increase in the ceiling depth could be necessary for ceilings with softer materials. Stronger cables and other fittings may also result in changes to the general setup. With regard to the variety of materials and manufacturers, we recommend installing a speaker sample in the ceiling first to define the exact requirements.

Product Attributes

Technical Diagrams

ic audio loudspeakers are tested and classified according to the IEC standard 60529 (degree of protection by enclosure) against the penetration of foreign objects and moisture. The classification is conforming to standards through characterization with a fixed code. This code consists of the letters IP (International Protection) followed by two digits. The first digit indicates the degree of protection against dust and the second digit the degree of protection against water. Please note that the testing of the products has been carried out in laboratory conditions which are not always 100% comparable with the conditions of different installation environments. This protection can be reduced due to normal wear and tear depending on the installation environment.

RoHS compliant (2011/65/EU)

The IP rating specified is based on ic audio test results, not on CNBOP-PIB test results. Certification only verifies the minimum requirements for EN54-24 compliance.
