

ADDITIONAL 7" MONITOR FOR SEE EASY KIT - SEM7MEW

Hands free white monitor for systems based on See Easy video kits, suitable to expand the 1SEK/MEW to 2-families system. The modern design makes it suitable for most of the house's interiors. The monitor and system programming can be done by multi language OSD menu with icons which allows also to program date and time, select call chime for door bell, external call and intercommunication among different tones and choose different volumes for the call ring during night and day. Moreover the system can automatically record a picture of the caller or, adding an optional SD card, a 10 seconds video footage. Very easy to install thanks to only two wires, not polarized, technology it is also user friendly thanks to hands-free voice activation working way. It is provided with its own mounting bracket and fixing accessories.
